

A large, stylized number '7' is positioned in the center of the image. It has a red-to-orange gradient and a white outline, with a glowing effect around its base. The word "SOLITAIRE" is written across the middle of the '7' in a bold, yellow, 3D-style font with a dark red outline.

SOLITAIRE

**CARD-BASED SINGLE PLAYER
CASINO GAME**

An all time classic

This type of card game has survived for generations, and we have made the perfect version. 7 Solitaire is our own beautiful take on the solitaire-type game, with a relaxing but sharp look and highly responsive functionality. Simply place each suit - i.e spades, clubs, hearts and diamonds - in the right order from the lowest card - the Ace - to the highest card - the King - in the spaces on the top right of the screen.

We have four tiers of difficulty on this game, each requiring a different stake from the user. The size

of the prize depends on the size of the stake. The winnings are only awarded if the user manages to solve the solitaire.

We'd hate to let players miss out on the bigger prizes, so we included a Jackpot Spin in this game! So long as the player completes the solitaire, they have the opportunity to win big on our Jackpot Spin - if it lands on the right spot, they win the pot! We can keep this as a local or global progressive pot - it's up to you!
