

# BACK GAMMON

**MULTI PLAYER DICE-BASED  
BOARD GAME**

# BACK GAMMON

## Best version on the market

This is a game that does not require an introduction. Backgammon is such a classic board game that we had to make a fantastic modern version for today's casino environment. An exciting and tactical game for two players, the objective is to be the first player to move all of your 15 checkers to your home side and then bear them off the board while you block your opponent from doing the same with your own checkers.

Players pit themselves against their opponent according to the stake before the game. You can choose the player network; local, for only players on your site; global, part of the global network between

sites; or glocal, where players are part of a global network but local players are selected first at every opportunity. The house takes a rake from the stake pot, and the winner takes the remainder from the pot. Simple!

Players also have the chance to win big on Backgammon, with our Jackpot Spin feature. Every time a player rolls an 8 or higher, they take one step on the Jackpot ladder, displayed on screen at all times. Once the ladder is complete, the Jackpot Spin is activated, with the progressive pot either local or global.
