

Diamonds

**MONETISED MATCH-3
PUZZLE GAME**

Diamonds

Diamonds are forever

You could say this game is the diamond in our crown, as Diamonds looks gorgeous, sounds amazing and is simply fantastic fun! This super addictive game, similar to Candy Crush, requires you to match diamonds of the same colour in a row of 3 or more to make them disappear. Once they disappear, new diamonds fall into the board and can cascade into new matches!

Pull off some larger rows of diamonds or make some interesting combos by thinking ahead for

some pretty special features. Once you start playing you'll quickly want to try and try again.

Players make a bet, against the house, that they can complete the level in a certain number of moves. Using a mixture of skill and chance, there are three tiers of difficulty, each of which has a different stake and reward. Players will be determined to not only win the money but to prove to themselves that they can beat the game!
